## CONCEPT D'AUTORE AUTHOR'S CONCEPT

Concepito come elementi decorativi per interni, le grandi lastre Vetrite divengono elementi in grado di caratterizzare l'esterno degli edifici sia dal punto di vista strutturale e architettonico sia sotto quello estetico.

Nasce quindi Vetrite Sight, una collezione caratterizzata da ritmi grafici leggeri ed eleganti, disegnati dallo Studio Marco Piva. Semplici grafie create a mano, lavorazioni ad acquerello e tempera poi rielaborate al computer e nuovamente graficizzate che prendono spunto dalle macchie di Rorschach.

Si creano così pattern che si propongono per nuove e suggestive interpretazioni, per vestire gli edifici con uno stile unico e distintivo.

Initially conceived as decorative elements for interiors, Vetrite large slabs can now be used to characterise even the structure and architecture of building exteriors, as well as their appearance.

Vetrite Sight is born, a collection distinguished by light and elegant graphical rhythms, designed by Studio Marco Piva. Simple graphics created by hand with watercolour and tempera designs, processed by a computer and then reproduced, inspired by Rorschach inkblots.

Patterns are thus created and proposed for new and suggestive interpretations to decorate buildings with a unique and distinctive style.

## ALTA PROGETTUALITÀ HIGH DESIGN

Belle, ma anche resistenti. Dopo essere state sottoposte a innumerevoli test interni per perfezionarne le qualità tecniche, le lastre Vetrite hanno ottenuto certificazioni ufficiali di resistenza a urto, impatto, carico statico e dinamico. Sono inoltre resistenti a macchie, raggi UV, alte e basse temperature e all'umidità.

La possibilità di realizzarle in diversi spessori – dai 6 ai 20 mm – le rende adattabili a qualsiasi necessità progettuale.

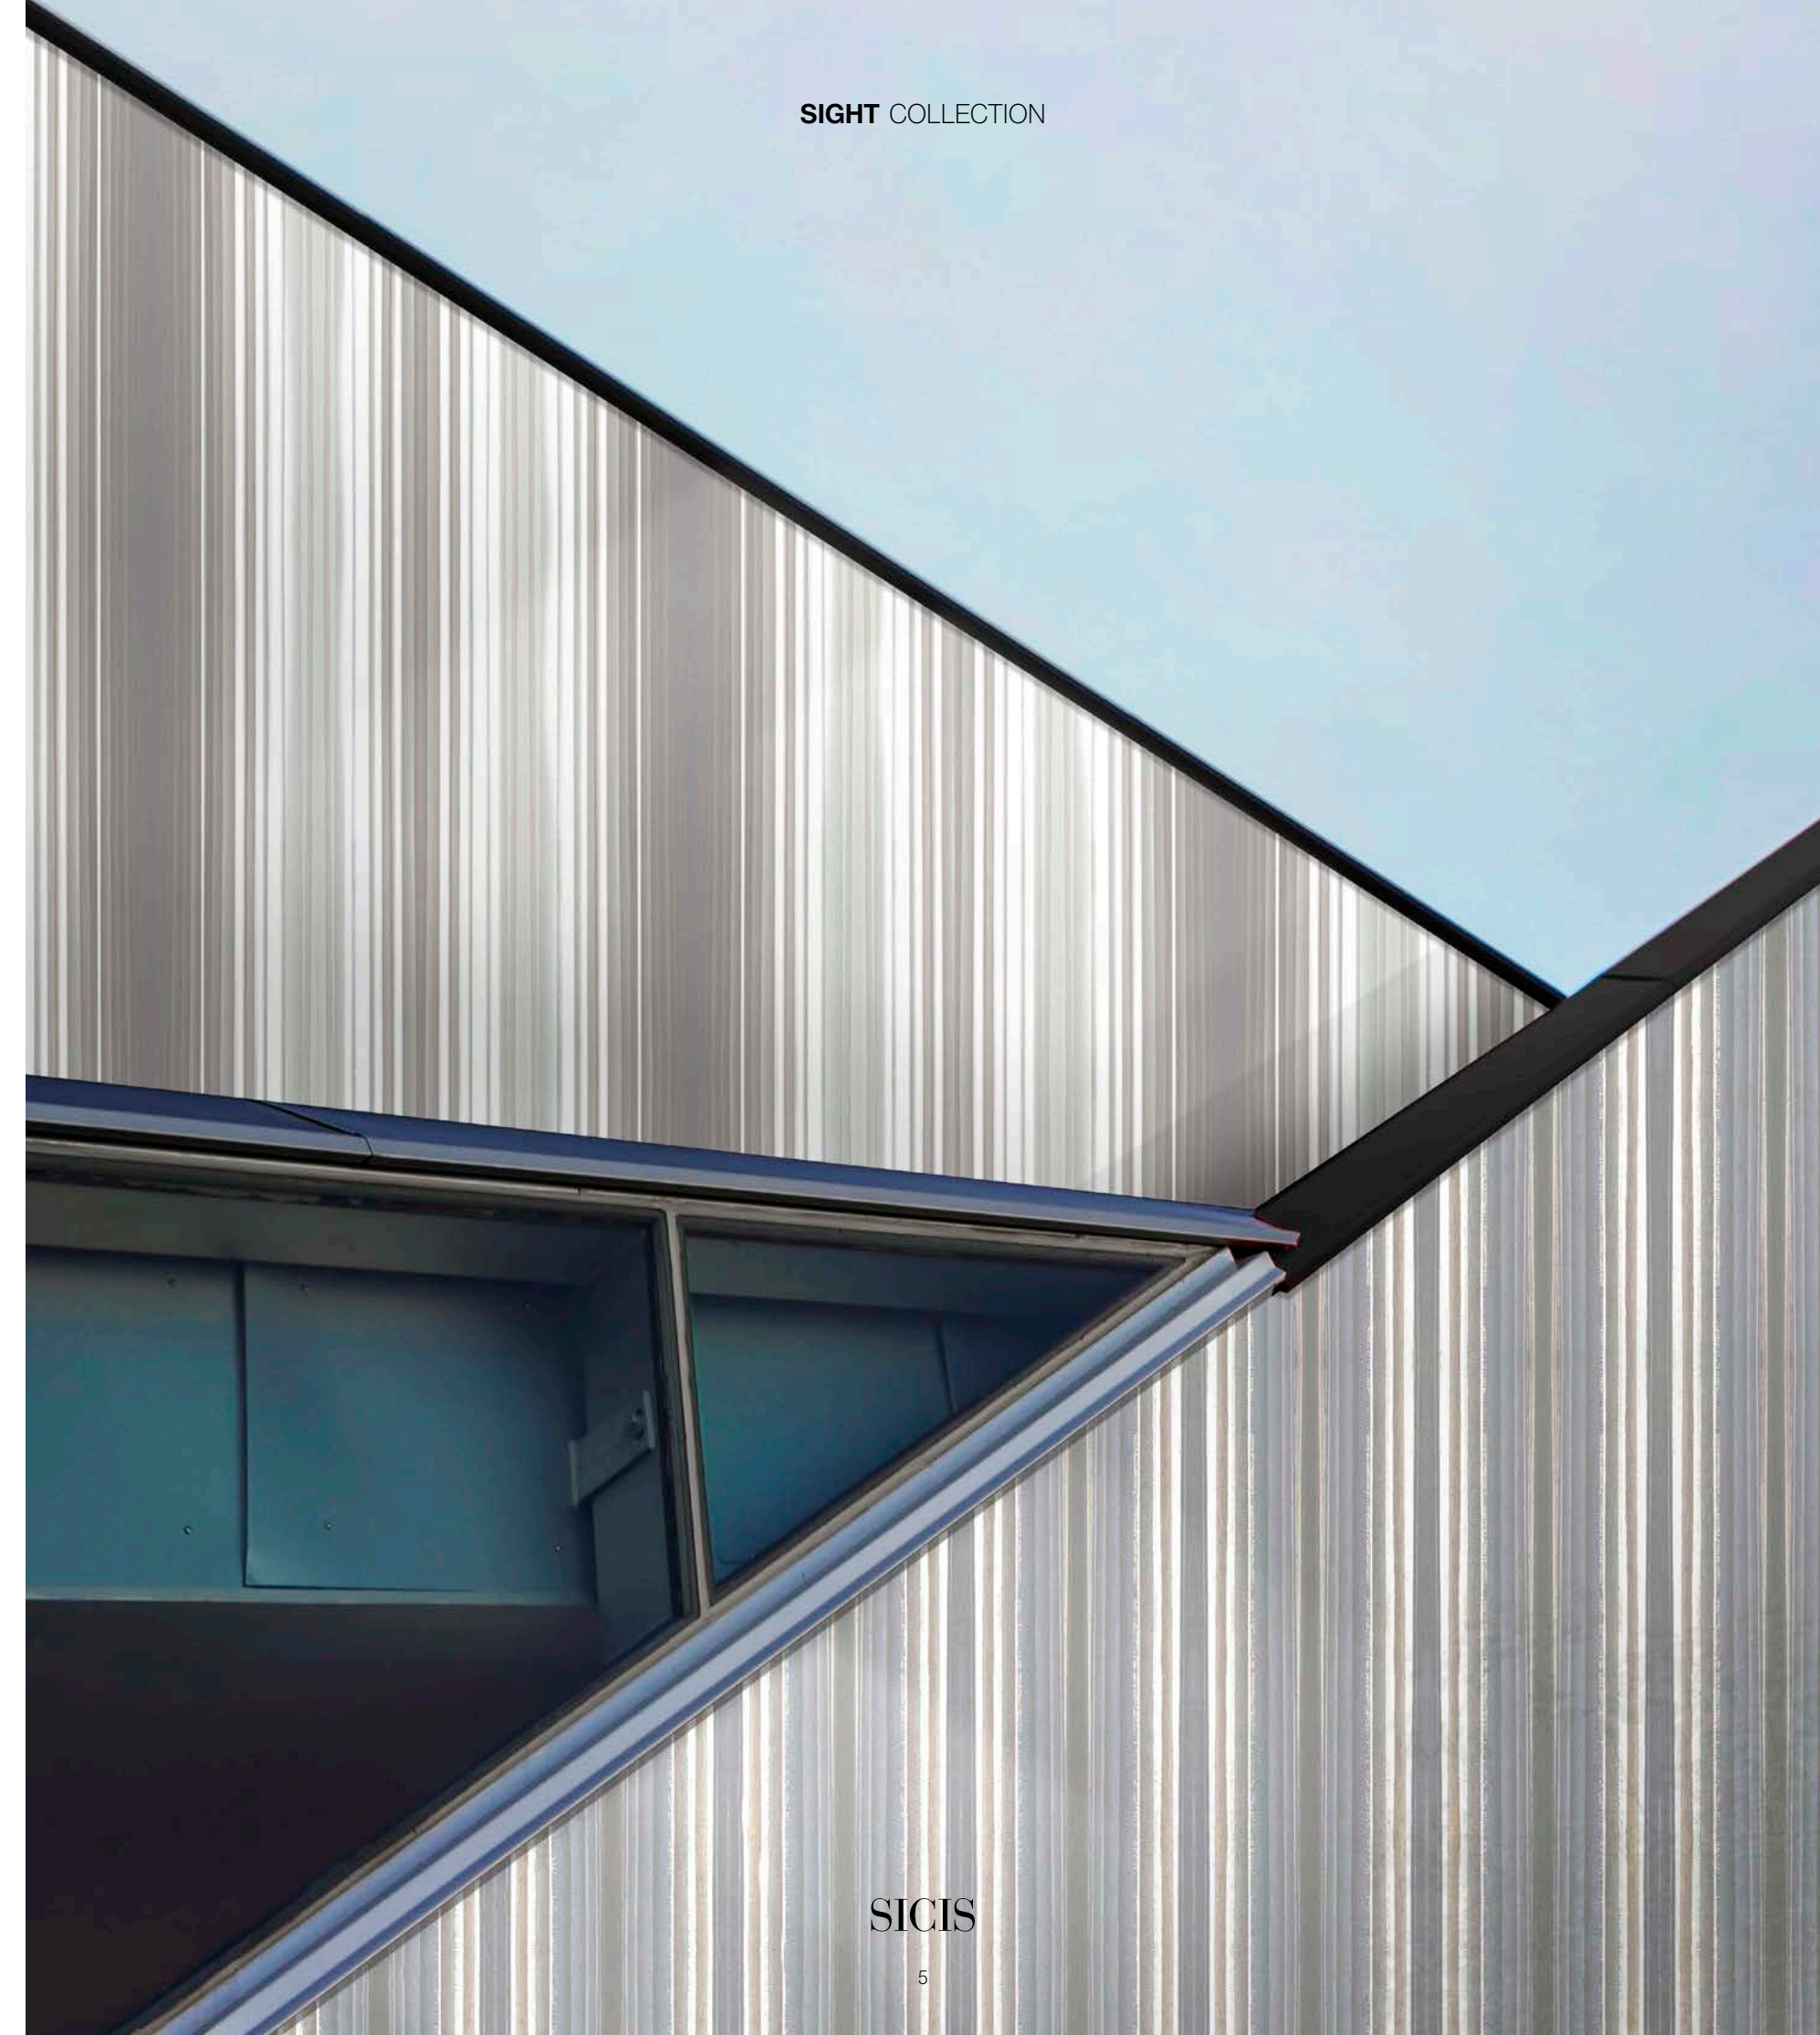

L'insieme di tutte queste caratteristiche fa di Vetrite Sight un prodotto perfetto per l'utilizzo in applicazioni esterne. Diventa così una scelta assai apprezzata nella progettazione di edifici, sia ad uso residenziale che pubblico.

Beautiful, but also resilient. Further to countless internal tests carried out to perfect their technical quality, Vetrite slabs have obtained official certification for their shock and impact resistance, static and dynamic load. They are also resistant to stains, UV rays, high and low temperatures, and humidity.

They can be developed with variable thickness – from 6 to 20 mm – making them adaptable to all design needs.

All these characteristics make Vetrite the perfect product for use in outdoor applications.

It has thus become a highly valued choice in both residential and public building design.

**INTERIOR DESIGN**  
INTERIOR DESIGN

**ARCHITETTURA**  
ARCHITECTURE

**FLESSIBILITÀ**  
FLEXIBILITY

È la loro capacità di adattarsi a svariati ambiti che rende queste lastre così interessanti.

Nel design di interni si prestano a rivestire superfici orizzontali e verticali, ma possono benissimo essere usate anche come elementi strutturali di un ambiente. Possono diventare porte, scorrevoli o a battente, per creare un tutt'uno con le pareti. Si prestano inoltre a rivestire mobili e complementi, top cucine, cabine armadio o ascensori.

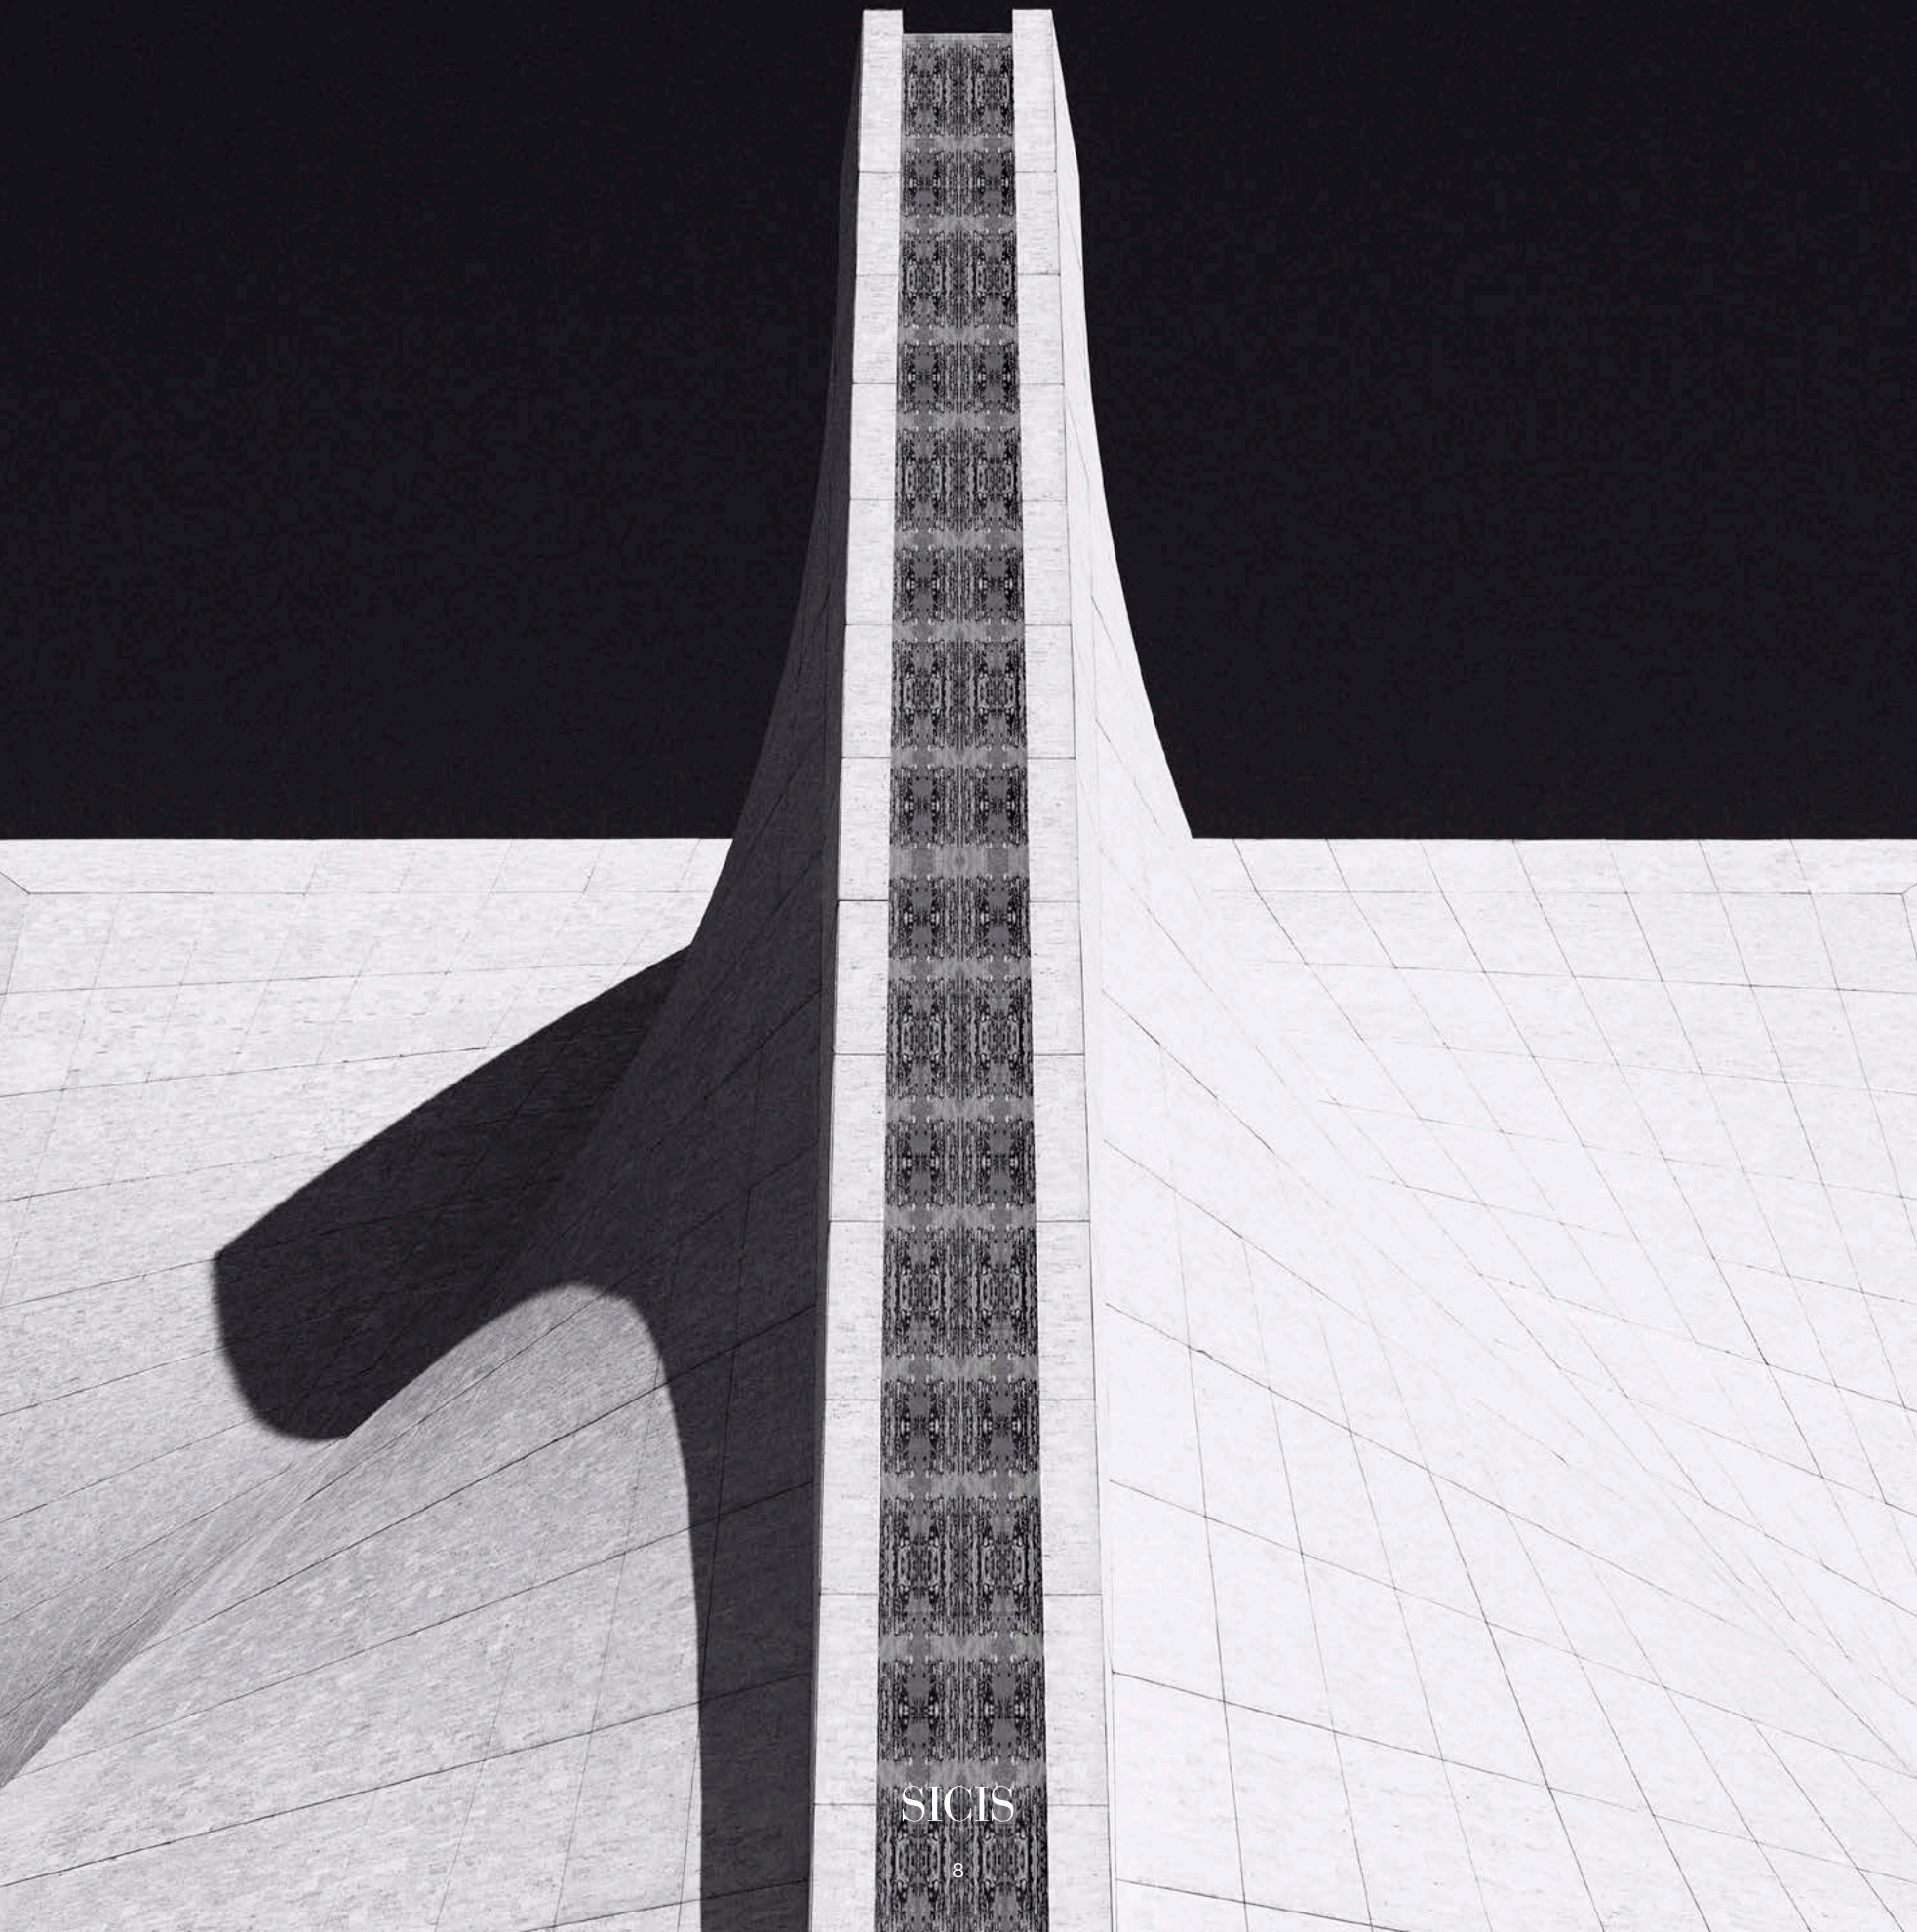

Anche per l'utilizzo in architettura le possibilità offerte da Vetrite Sight sono molteplici. Sono perfette per facciate, coperture, schermature, parapetti e balaustre, pronte a valorizzare anche il più ardito dei progetti.

It is the ability to adapt to various environments that makes these slabs so interesting.

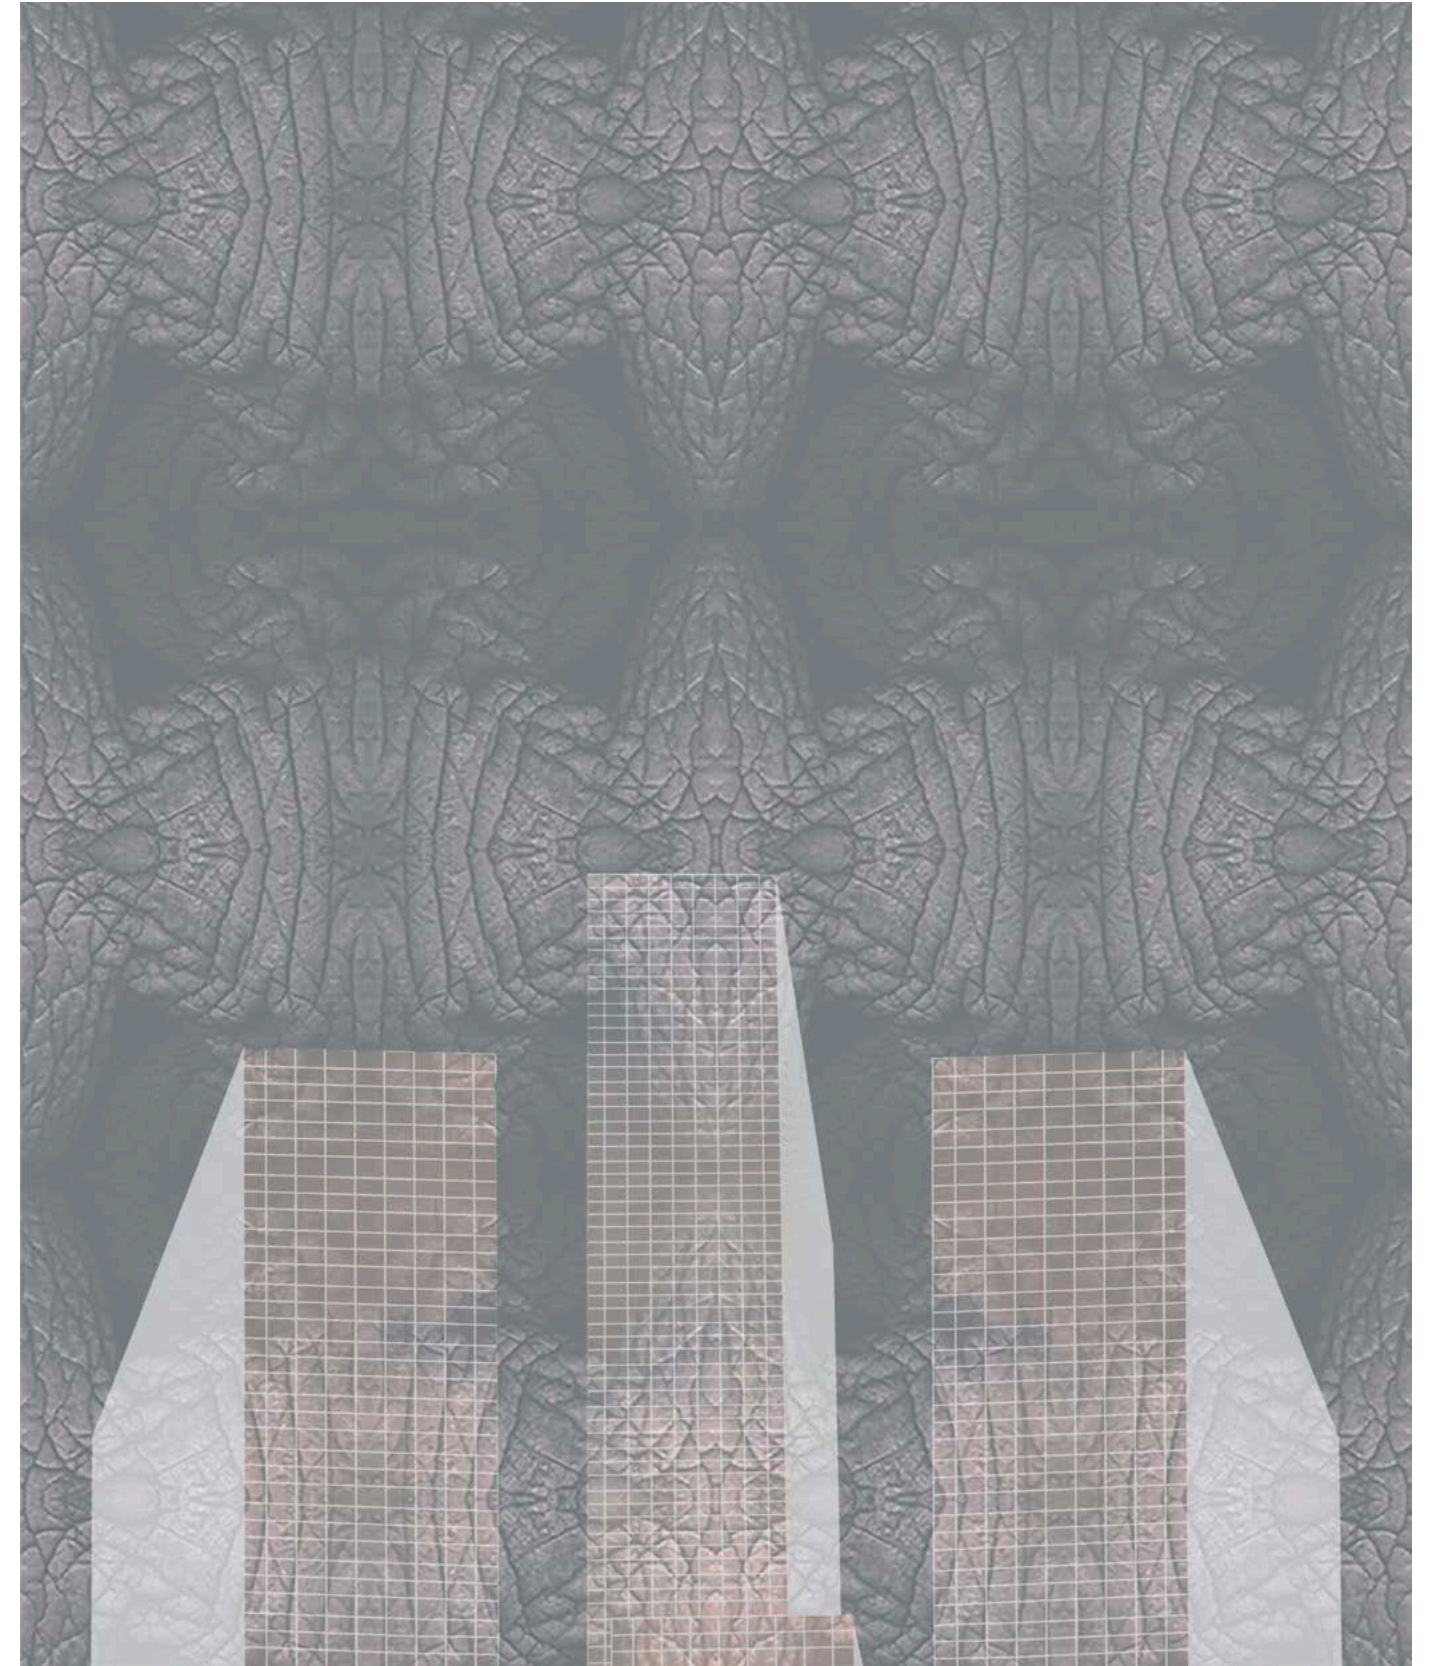

For interior designs, they are suited to either horizontal or vertical surfaces, but can also be used as the structural elements of a given space. They can become swing or sliding doors to create a seamless look with the walls. They are also ideal for covering furniture elements and furnishings, such as kitchen tops, walk-in wardrobes, or elevators.

The possibilities offered by Vetrite are infinite, even in architecture. They are perfect for façades, roofs, screens, parapets and balustrades, able to enhance even the most daring projects.

SICIS

SICIS

Tutti i pattern Vetrite Sight sono disponibili in varie finiture, per offrire potenzialità progettuali ancora più ampie. Di particolare interesse è la finitura trasparente.

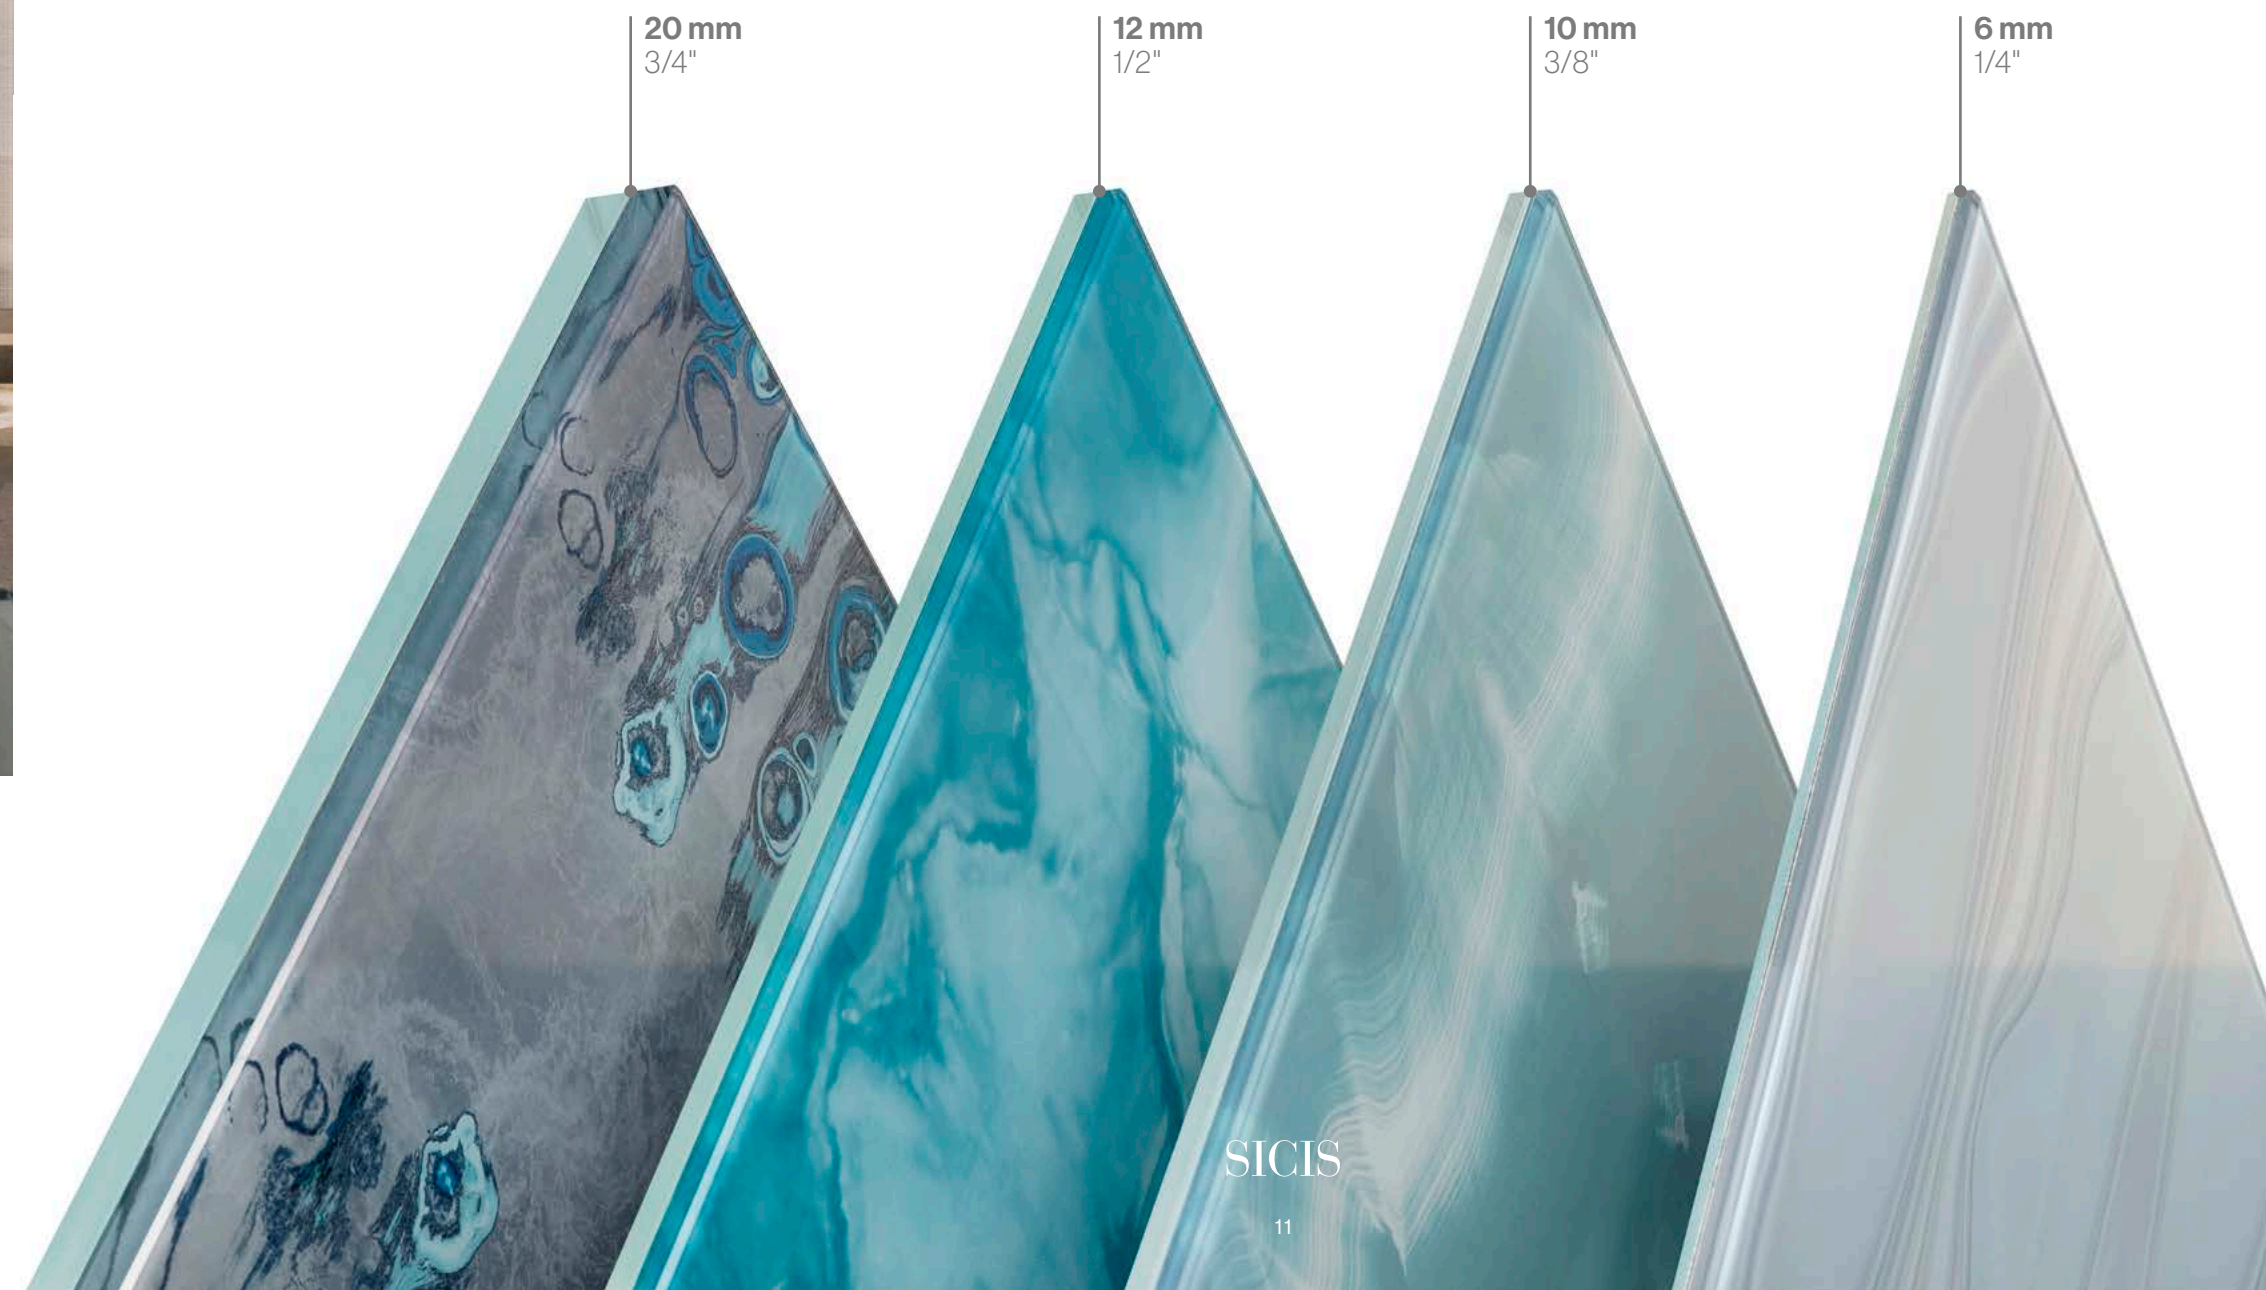

Molto apprezzata nella progettazione di facciate o parapetti, è la scelta ideale per consentire il passaggio della luce esterna pur mantenendo inalterato il suo aspetto estetico, garantendo allo stesso tempo la privacy. Le lastre possono essere realizzate su richiesta anche con trasparenza graduale, passando da una totale trasparenza del decoro alla totale opacità.

## RIFLESSI E TRASPARENZE REFLECTIONS & TRANSPARENCIES

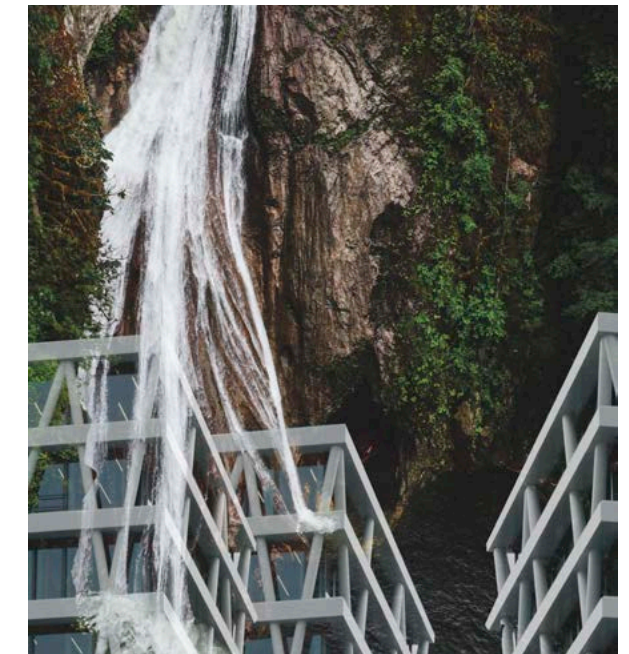

All Vetrite Sight patterns are available in various finishes to offer even broader design potential. The clear finish is particularly interesting: highly valued in façade or parapet designs, it is the ideal choice to allow the passage of external light without altering its visual appeal, while at the same time ensuring privacy. On request, the slabs can also be made with graduated transparency, ranging from a totally transparent, to a totally opaque decoration.

## SPESSORI THICKNESS

## AMBIENTE ENVIRONMENT

Altamente innovativa, ma con uno sguardo rivolto all'ambiente. Vetrite Sight è composta per la maggior parte da vetro; materiale riciclabile al 100%.

Inoltre, trattandosi di vetro laminato, può essere ingegnerizzato per schermare dai raggi IR e contribuire all'efficientamento energetico degli edifici impedendo l'eccessivo riscaldamento dovuto all'azione solare.

L'attività fotocatalitica prodotta come reazione dell'esposizione alla luce, e certificata da test di laboratorio, permette di ottenere un materiale autopulente in grado di impedire al 99,9% la formazione di muffe e batteri sulla sua superficie. Questa caratteristica consente di ridurre sensibilmente l'utilizzo di detergenti chimici per la pulizia delle superfici.

Extremely innovative, but with an eye to the environment. Vetrite Sight is made mostly of glass, a 100% recyclable material.

Moreover, since the glass is laminated, it can be engineered to shield IR rays and contribute to the energy efficiency of buildings, preventing excessive heating caused by the sun.

The photocatalytic activity produced as a reaction to exposure to light is certified by laboratory tests, making it possible to obtain a self-cleaning material capable of preventing the formation of mould and bacteria on the surface at a rate of 99.9%. This feature allows a significant reduction in the use of chemical detergents for cleaning surfaces.

## TRASPARENZE LUMINOSE LIGHT TRANSPARENCIES

Seducenti non solo alla luce del giorno, ma anche quando cala il buio. La lastra con finitura opalescente regala accattivanti effetti luminosi quando applicata sopra a una sorgente di luce, come un pannello led.

Questo lascia ampio margine alla creatività, permettendo di realizzare pareti retroilluminate dal fascino magnetico, così come colonne o addirittura pavimenti.

La luce in questo modo non è più solo un complemento d'arredo ma diventa un elemento integrante del design di un ambiente.

Seductive not only in the light of day, but also when night falls. The slab with opalescent finish offers captivating light effects when applied over a source of light such as a LED panel.

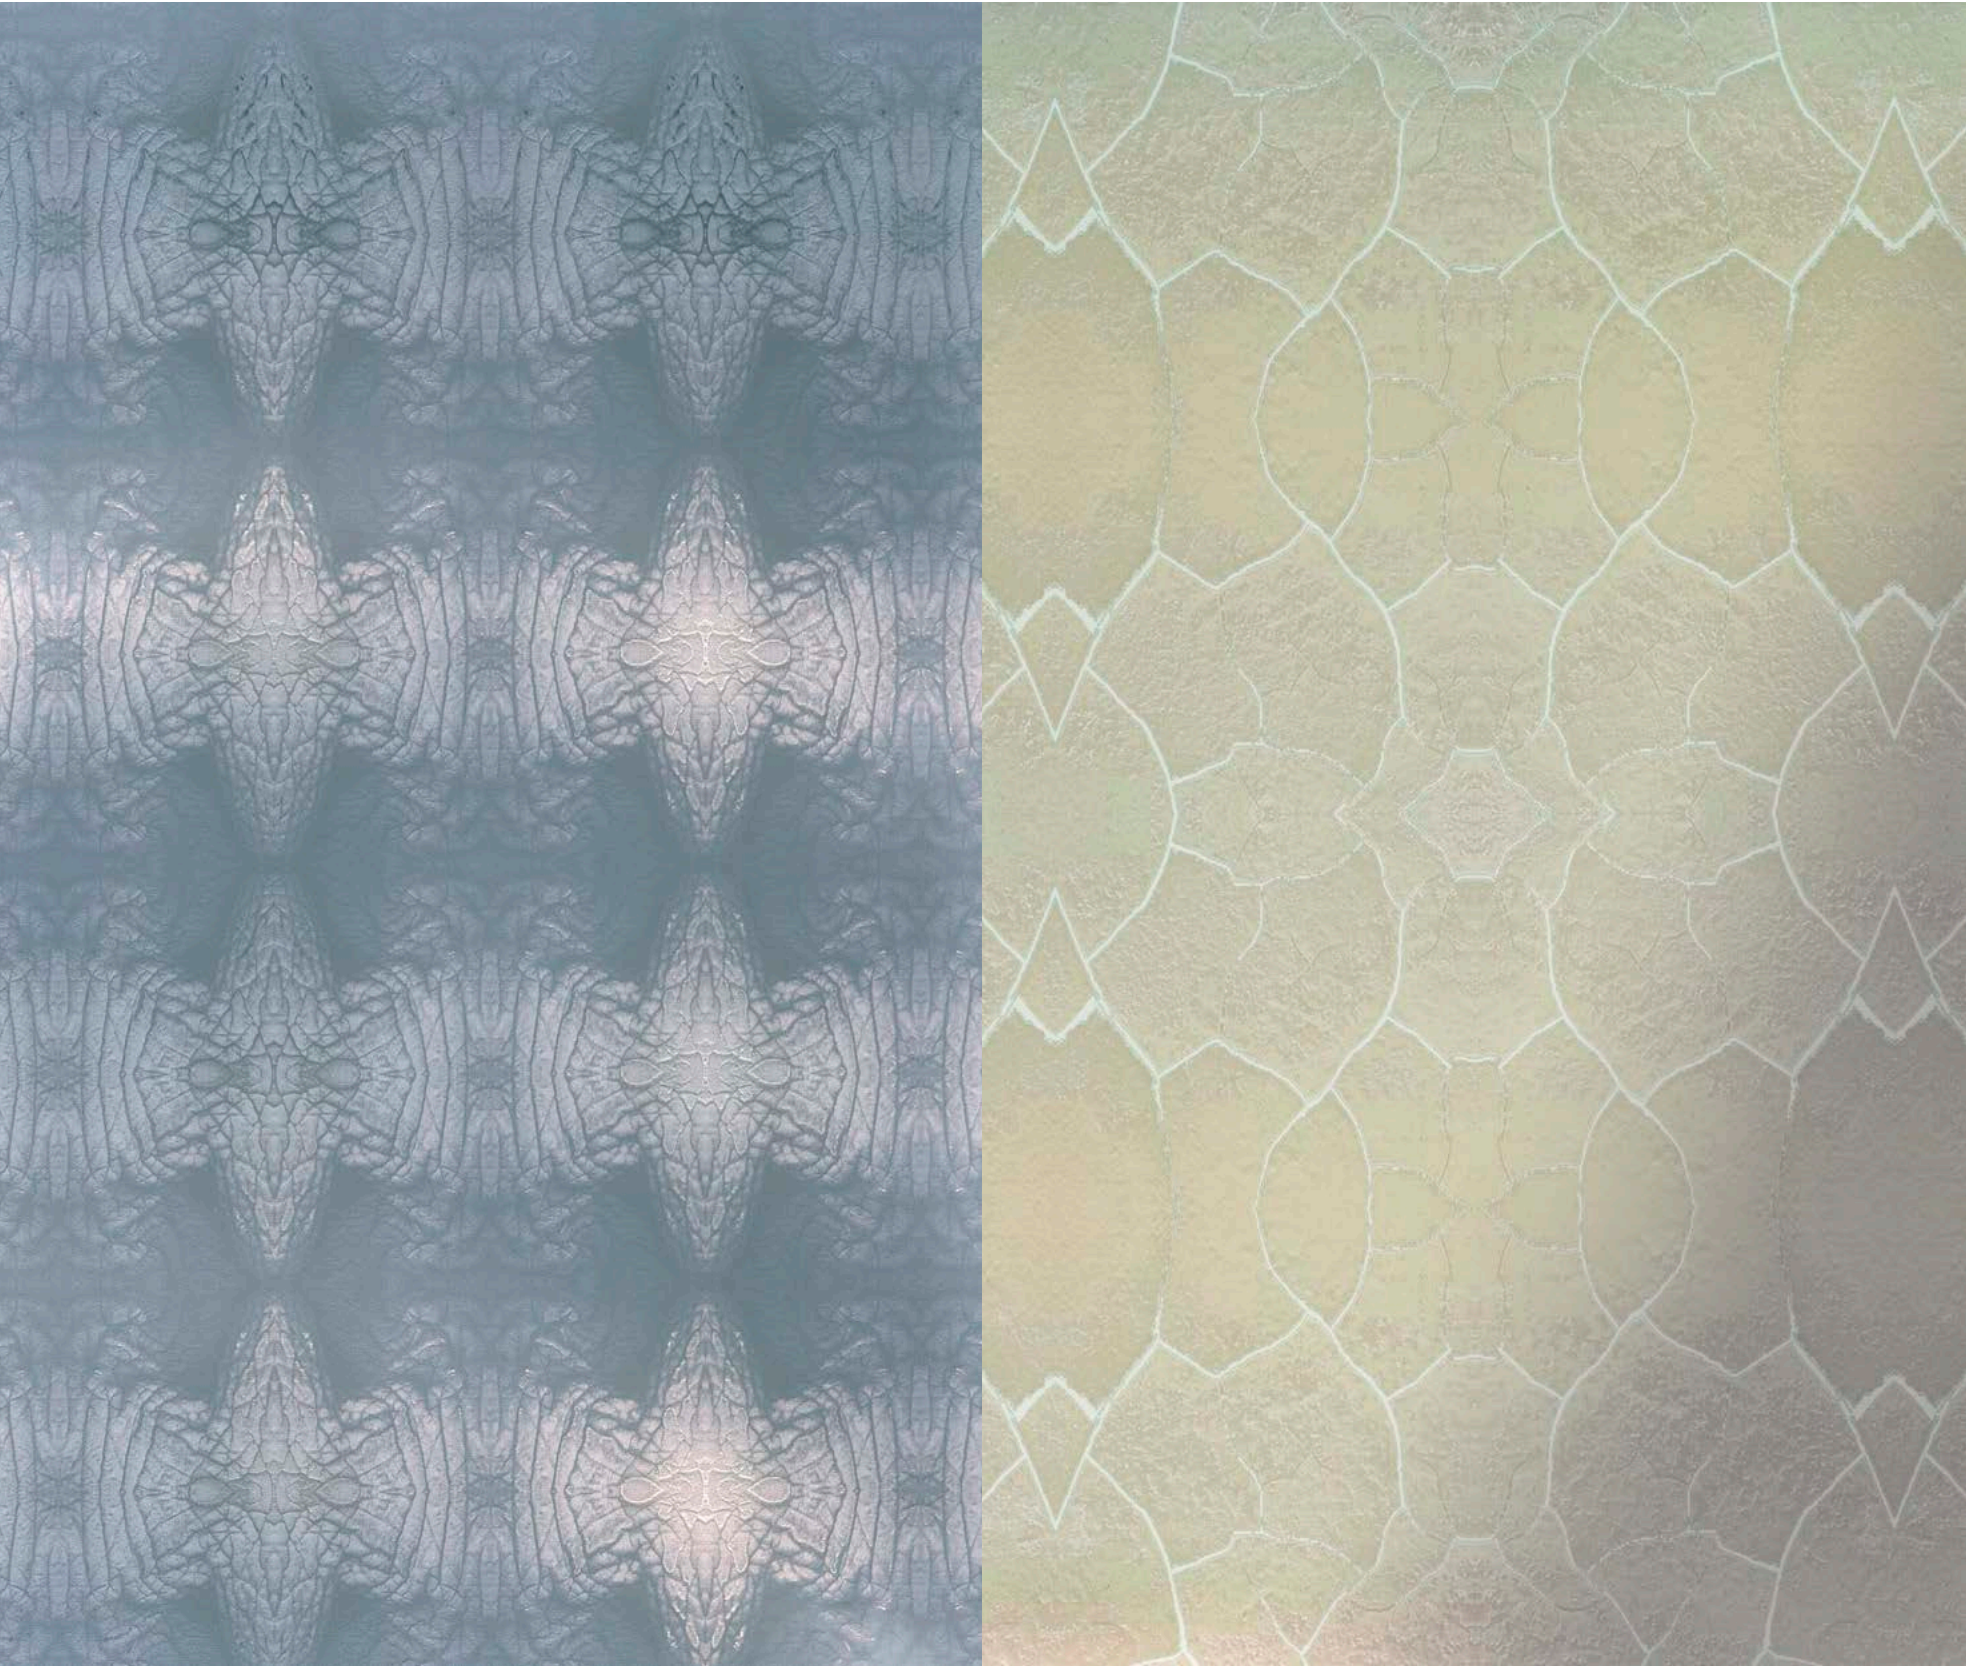

This leaves ample room for creativity, allowing the development of backlit doors with magnetic appeal, as well as columns or even flooring.

The light thus becomes not only a furnishing, but a genuine element incorporated into the room's design.

SMART LIVING  
SMART LIVING

Sempre un passo avanti in campo tecnologico. Nell'utilizzo come rivestimento a parete Vetrite può essere integrata con speciali tastiere touch per permettere l'interazione con i sistemi di domotica, sia in ambito residenziale che hospitality.

I pulsanti, attivati dal sensore di prossimità, emettono una luce personalizzabile e visibile attraverso l'opalescenza della lastra. Basta sfiorare l'interruttore per interagire con l'impianto di automazione. Il sistema consente di avere tastiere praticamente invisibili, perfettamente nascoste all'interno della parete, una soluzione estremamente elegante e funzionale.

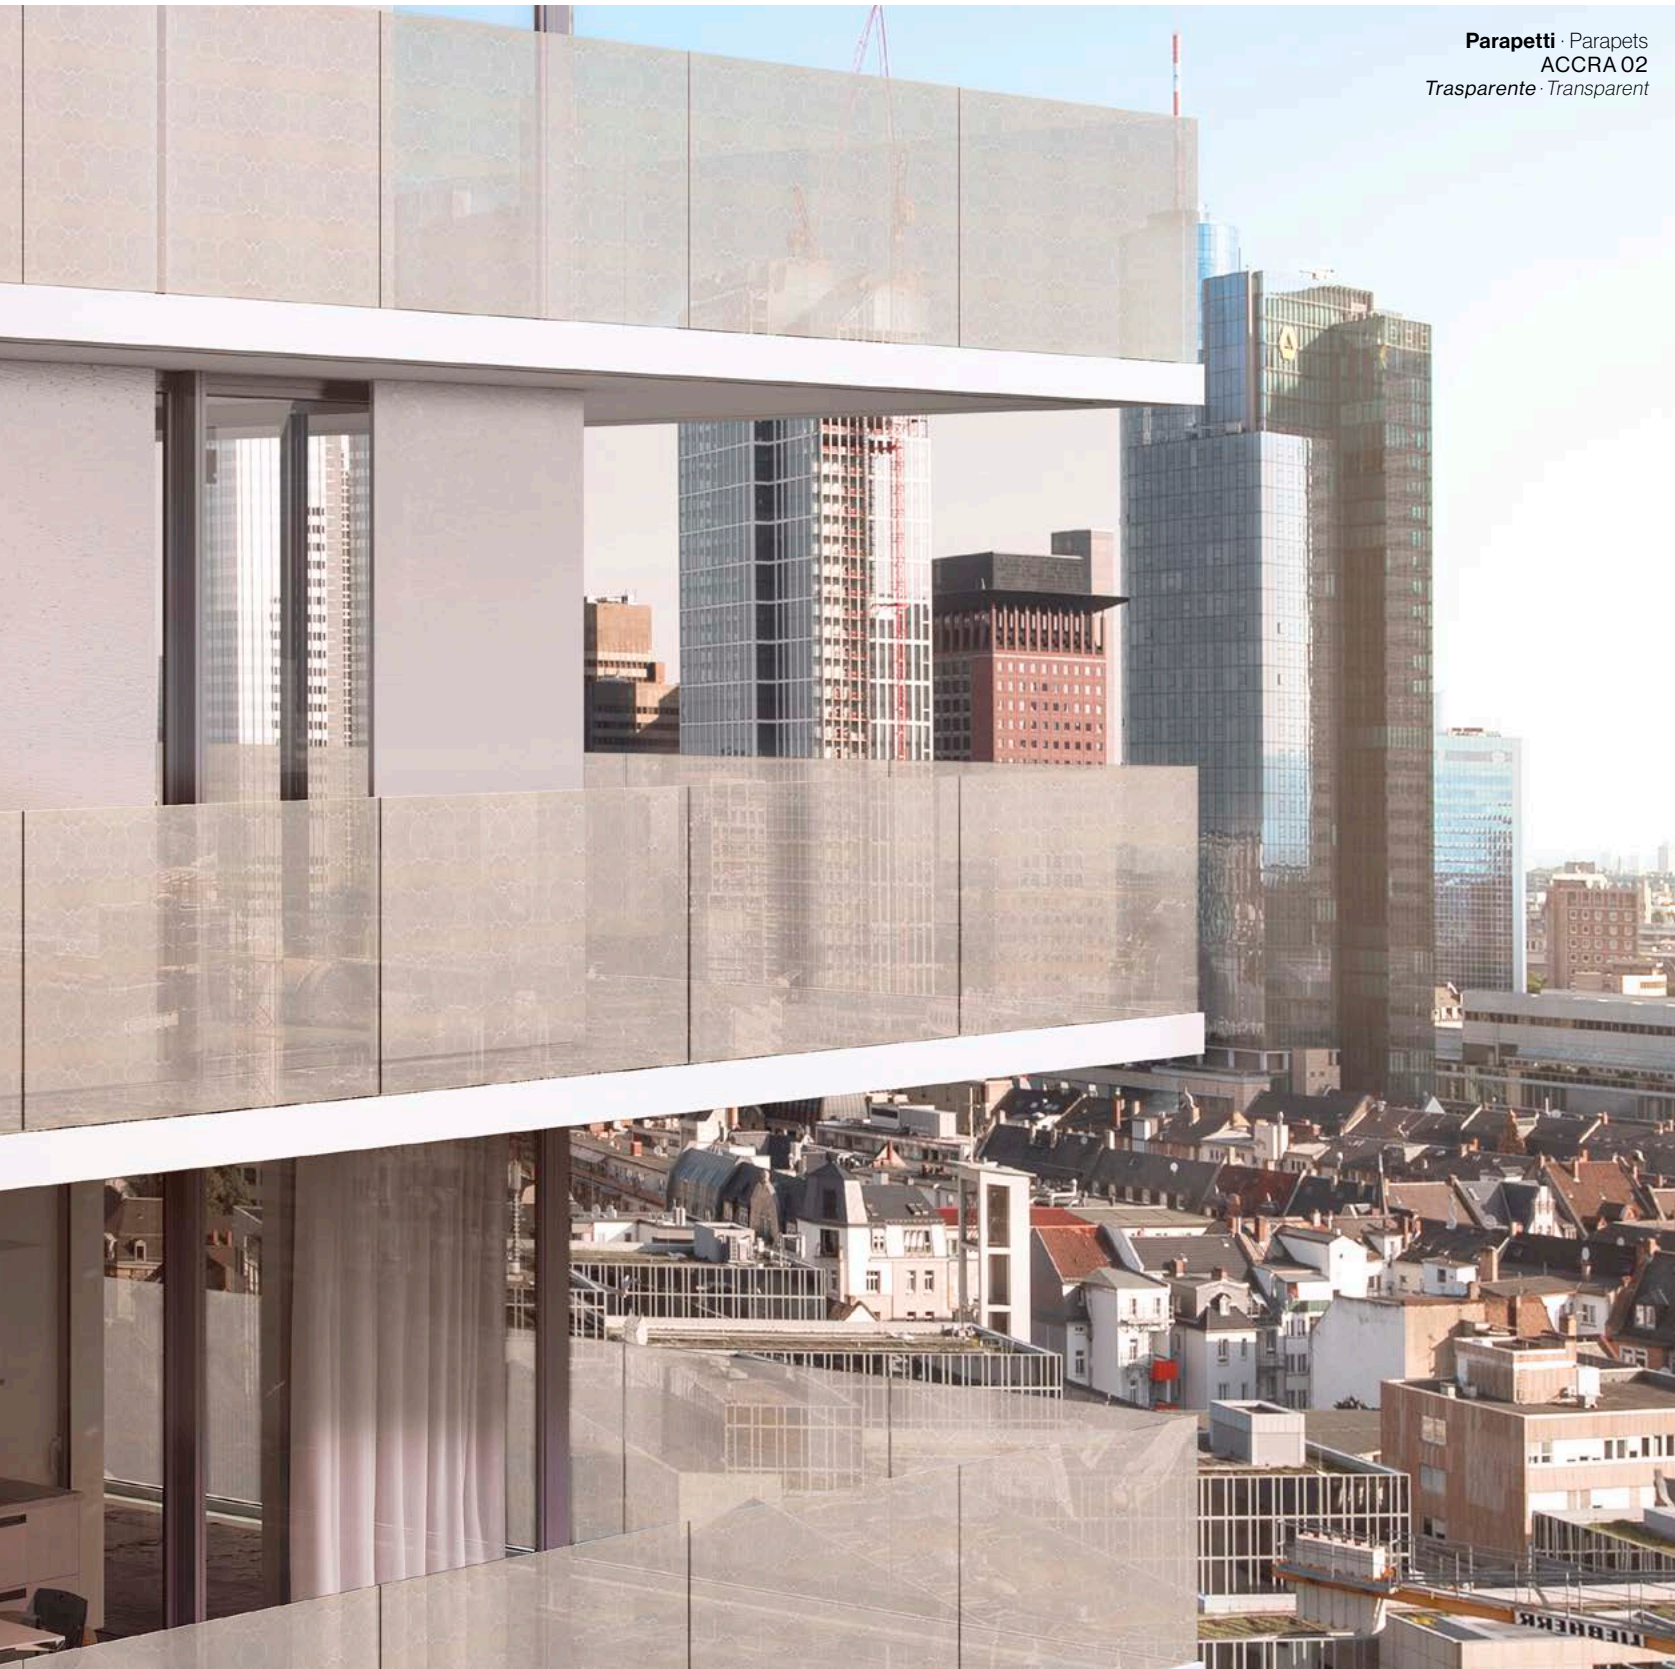

Always one technological step ahead. When used as a wall covering, Vetrite can be integrated with special touch keypads to allow interaction with home automation systems, in both residential and hospitality environments.

The buttons, activated by a proximity sensor, emit a customisable light, visible through the opalescence of the slab. The switch simply needs to be touched to interact with the automation system. This system allows practically invisible keys, perfectly hidden inside the wall for an extremely elegant and practical solution.

## BALCONE FILO MURO INTERNO O SU FACCIATA PORTANTE BALCONY FLUSH WITH INTERNAL WALL OR LOAD-BEARING FACADE

**Destinazioni d'uso:** ogni balcone è studiato per essere fissato fronte muro o interno vano.  
**Velocità di montaggio:** il montaggio è immediato, bisogna accertarsi però di fissarsi su un supporto portante.

**Per ambienti poco affollati:**  
Residenziale Categoria C2 -> 200 kg/m (testato a 300 kg/m)  
**Per ambienti molto affollati:**  
Commerciale Categoria C3 -> 300 kg/m (testato a 450 kg/m)

**Entrambi i sistemi accolgono:**  
sia il vetro mm 8+8 che il mm 10+10 con le relative guarnizioni.  
L'altezza del parapetto può arrivare fino a 1,2 metri.

**Finiture:**  
Personalizzazioni di serie e su richiesta.

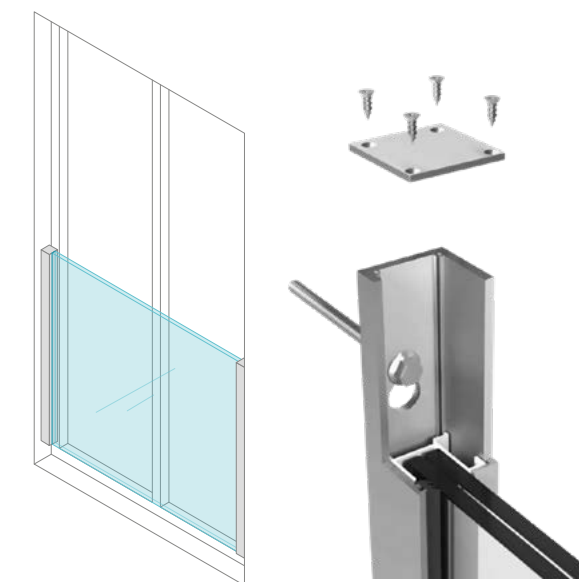

**Intended use:** each balcony has been designed to be fixed to the external wall surface or within the reveal.  
**Speed of assembly:** assembly is immediate; however, the balcony must be fastened to a load-bearing support.

**Low-traffic areas:**  
Residential Class C2 -> 200 kg/m (tested at 300 kg/m)  
**High-Traffic areas:**  
Commercial Class C3 -> 300 kg/m (tested at 450 kg/m)

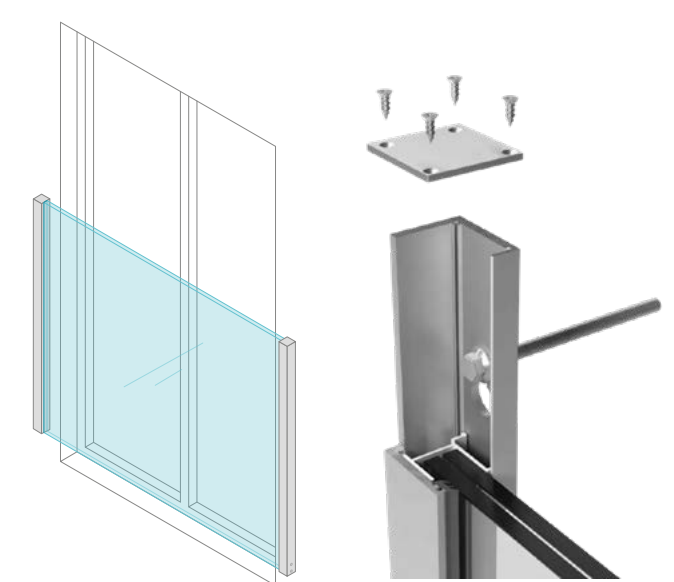

**Both systems can accommodate:**  
both 8 + 8 mm and 10 + 10 mm glass with the proper gaskets.  
The balustrade height can reach up to 1.2 meters.

**Finish:**  
Standard finish, customization upon request.

①  
**BALCONE INTERNO:** fissaggio interno vano (ovvero all'interno del vano dell'infisso)  
**INTERNAL BALCONY:** fixed to the reveal (i.e., within the window opening)

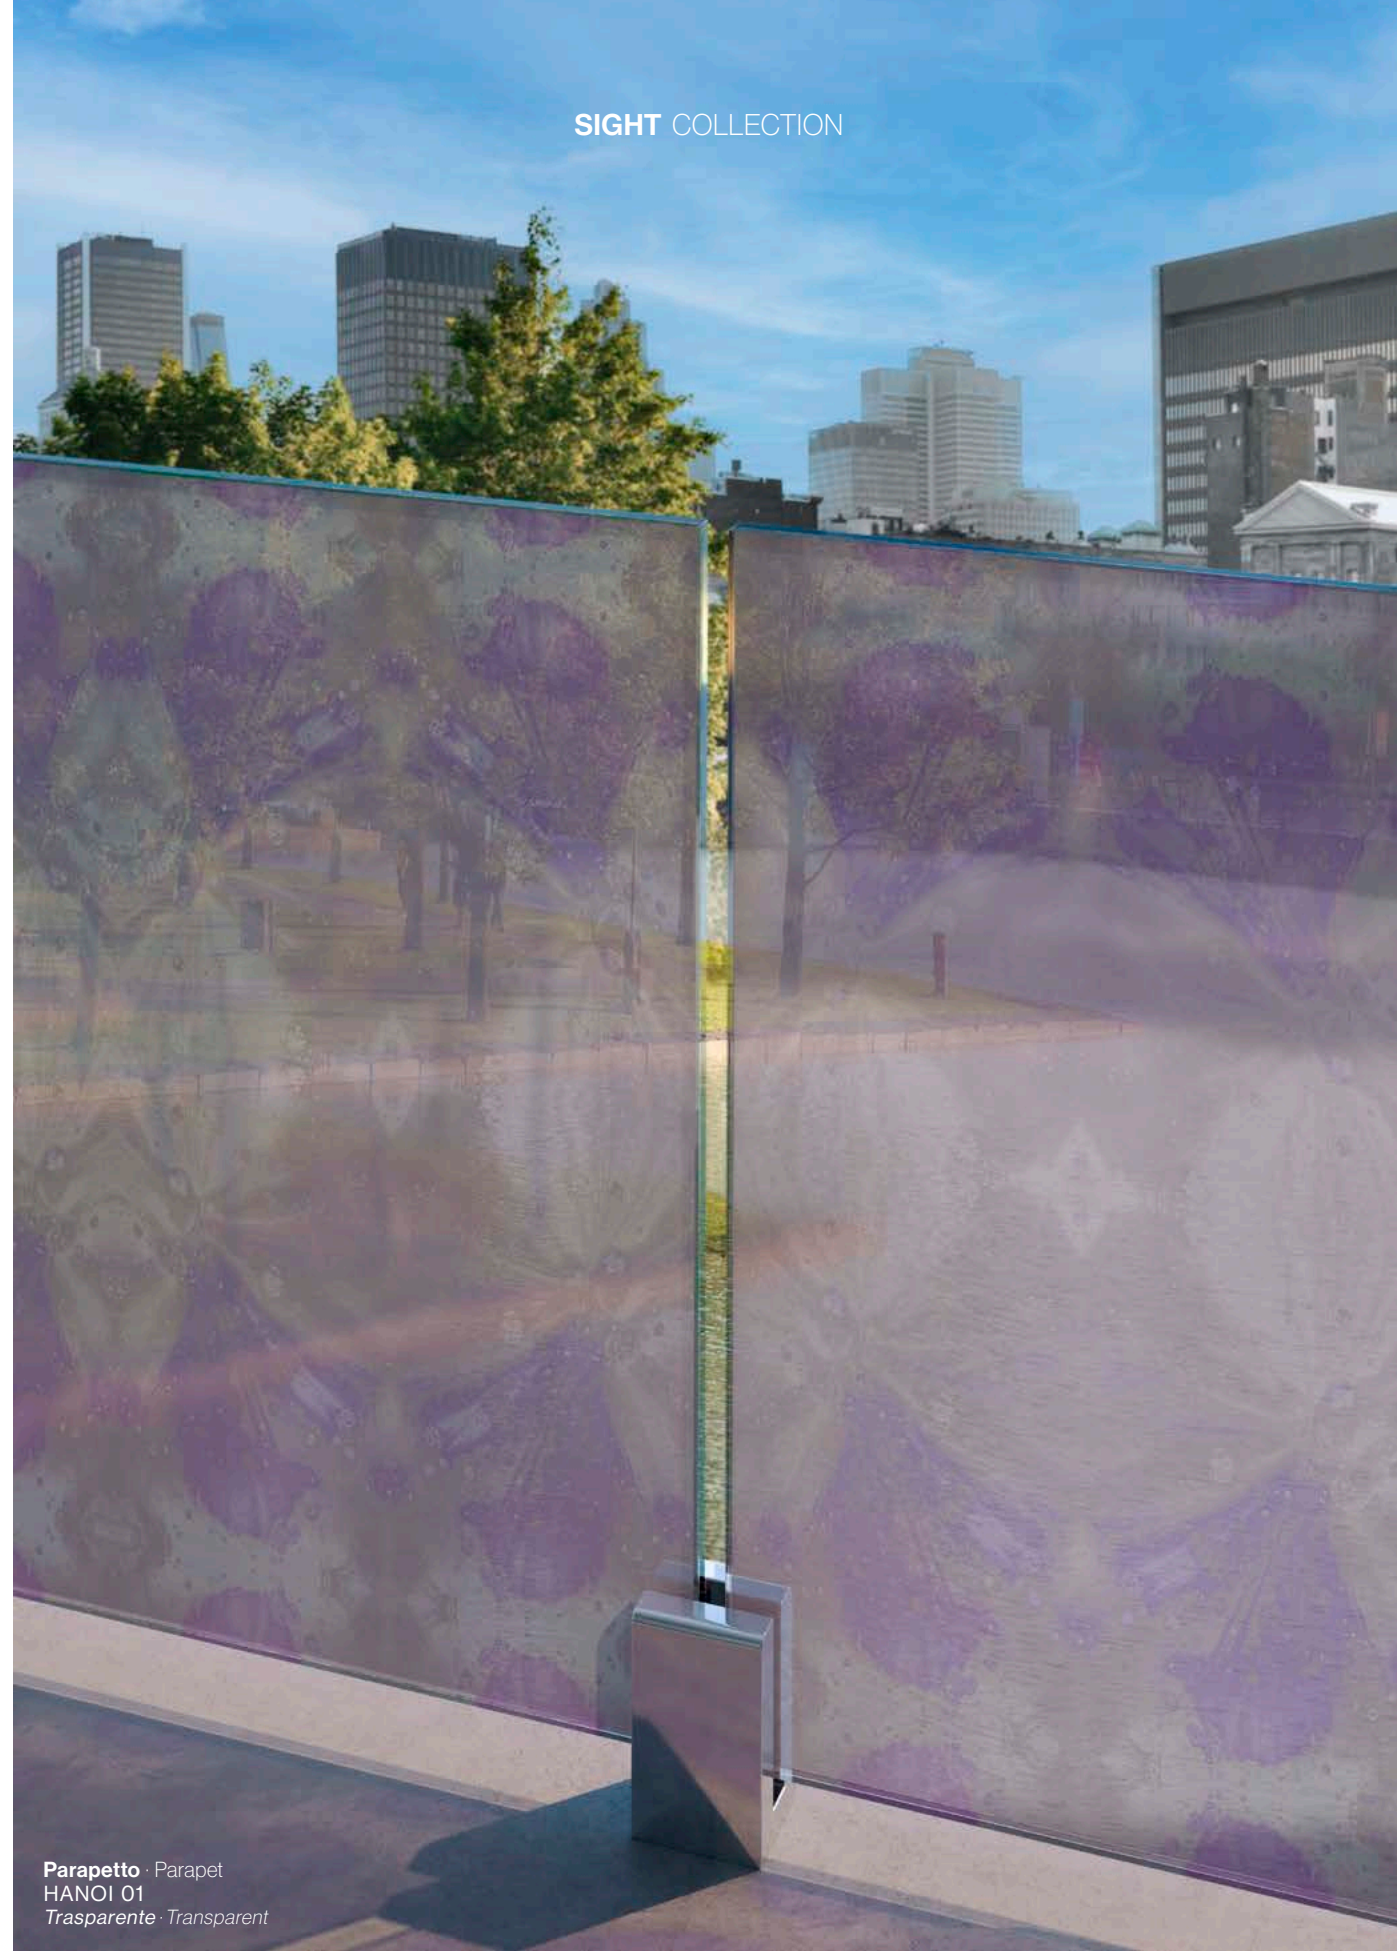

②  
**BALCONE ESTERNO:** fissaggio fronte muro (esternamente dal vano della finestra direttamente sulla facciata)  
**OUTDOOR BALCONY:** fixed to the external surface of the wall (i.e., externally either side of the window opening)
